

**NOTICE 31/17**

**Date:** 19 July 2017

**Subject:** MiFID II Adaptation. HF MEFFGate FIX APIs, new specifications.

---

MEFF announces the release of the updated documentation for the **HF MEFFGate FIX** APIs, version M5.0, and version T5.0, which incorporate the adaptations to be carried out according to MiFID II/MiFIR.

These specifications incorporate the followings changes:

- Modification of the reserved values in the Client Identification (page vii T5.0).
- Added, modified and removed tags for the new RFQ trading system (not available yet) (page vii, viii T5.0).
- Review of certain characteristics of different tags (page viii, ix T5.0 and page v M5.0).
- Incorporation of Extraordinary Market Conditions (page v M5.0).
